Hwan Chin Yang

Software Engineer · Full-Stack

Selangor, Malaysia · +60 16-605 7790 · hwan2221@hotmail.com · hwanchinyang.com · github.com/ZenoHwanEth

SUMMARY

Full-stack engineer with 5+ years shipping production web products across crypto, insurtech and fintech. Currently building crypto market-data infrastructure at Coinranking — real-time price pipelines, microservices, and account/billing. Comfortable from the UI down to the container: TypeScript and Go services, React/Next.js/Astro frontends, MariaDB/MongoDB/Redis, Docker on AWS.

EXPERIENCE

Software Engineer — Coinranking

Jul 2024 – Present

Remote · Crypto market data

- Full-stack on Coinranking Hub, a production crypto market-data platform serving live prices and analytics.
- Build and run microservices in Node.js/TypeScript and Go behind Fastify and Express APIs, backed by MariaDB and Redis.
- Own account and billing end-to-end — plans, API-key issuance, usage metering and upgrade flows.
- Ship customer-facing surfaces in Astro and React; containerised workloads on Docker/AWS.

Full Stack Developer — Bjak

Aug 2021 – Jul 2024

Selangor, Malaysia · Insurance & lending

- Bootstrapped Motor Loan from zero — architecture, data model, lender integrations and launch.
- Shipped motor insurance and motor loan products on Next.js, NestJS, Node.js, Express, React and MongoDB.
- Built and maintained Puppeteer scrapers that quote and purchase policies directly from insurer portals.
- Implemented AI features for the loan product: payslip extraction, bank-statement parsing and IC fraud detection (Python, FastAPI).

Full Stack Developer Intern — Seagate

Feb 2020 – Jul 2020

Penang, Malaysia · Access provision

- Built and documented in-house access-provision tooling with Java, JSP, Servlets and SQL; delivered a feature letting new employees mirror an existing colleague's access profile.

SELECTED PROJECTS

Fuyoh — fuyoh.my

Feb 2025 – Jul 2026

Malaysian insurance aggregator · core contributor across four services (18 months)

- Built the Go/Gin backend on MongoDB and Redis, integrating Takaful Ikhlas, Allianz, Generali, Tokio Marine and Zurich for quotations, policy issuance and payments (SenangPay, AhaPay); instrumented with OpenTelemetry and Prometheus.
- Built the headless scraper service (TypeScript, Playwright, Express) that recovers quotes when insurer portals return referred cases instead of a price — turning dead-end submissions into completed quotes.
- Built the Next.js 14 frontend with Redux Toolkit and next-intl across EN/MS/ZH, covering motor, travel, property and business quote flows.
- Wrote the Go microservice that renders policy and report PDFs from HTML templates via headless Chromium.

Check4DResult — check4dresult.com

- Live Malaysian 4D results for Magnum, Sports Toto and Da Ma Cai, auto-refreshing during draw windows.

Idential.xyz

deprecated

- Search engine over Web3 on-chain credentials by name and Ethereum address. Awarded USD 6,000 in grants from Aave, Near and Alchemy. Next.js, MongoDB, Prisma, Alchemy SDK.

SKILLS

Languages	TypeScript, JavaScript, Go, Python, Java, SQL
Backend	Node.js, Fastify, Express, NestJS, Gin, FastAPI
Frontend	React, Next.js, Astro, Svelte, Tailwind, Redux Toolkit
Data	MariaDB, MongoDB, PostgreSQL, Redis, Prisma
Infra	Docker, AWS, OpenTelemetry, Prometheus, Playwright, Puppeteer

EDUCATION

BSc (Hons) Computer Science — Universiti Sains Malaysia

2017 – 2021

Penang, Malaysia
